

Top 8 Reasons to run your corporate site on PLATFORM**319** – over WordPress

1. **SPEED** – Websites and portals built on Platform319 render up to *5 times faster* than those built on WordPress, due in part to our proprietary cache engine.
2. **COST OF OWNERSHIP** – Corporate websites running on Platform319 have been proven to have a lower cost of ownership than sites running on WordPress.
3. **BUSINESS POWER** – Platform319 is equipped with *thousands* of business functions out-of-the-box, over and above anything offered by WordPress.
4. **SECURITY** – Every application within Platform319 has been 100% defined, built, tested, supported by 319 NetWorks, and is securely hosted in ISAE 3402 and SSAE 16 private cloud networks.
5. **RELIABILITY** – Uptime for websites and portals delivered on Platform319 is greater than 99.9%, assuring users that the web assets they need are available at all times. The entire platform and all modules are built by and supported by 319 NetWorks.
6. **EXPANDABILITY** – Platform319 enables the enterprise to easily expand into greater functionality as needs evolve. Importantly, the platform provides for expansion into full portal solutions, including Employee Portals, Client Portals, Vendor Portals, Unique Business Process Portals and more.
7. **RECONFIGURABILITY** – Dynamic-BlockSM technology, unique to Platform319, enable page layouts to be easily rearranged and reconfigured as needed, by simply clicking in a function desired. This best-in-class flexibility allows any needs to be met on the fly.
8. **SINGLE POINT OF RESPONSIBILITY** – You can assure success by dealing on single point for all software, training, support, development, hosting and enhancements.
